Paddle Range

Kiddy Cruiser Tough

Tailored to the needs of younger paddlers this model is lightweight with a shorter, adjustable shaft that can easily be extended as its owner grows. Adjustable from 130cm to 170cm.

A reduced shaft diameter means it is nicer to use for small hands and the ergonomically designed t-grip is smaller to fit a younger paddler.

Pieces - 3PC
Blade Area - 465cm²
Paddle Length - 130cm to 170cm
Shaft Material - Glass Fibre
Blade Material - Nylon
Weight - 883g

Cruiser Tough

A tough and reliable paddle, perfect for beginners

Meet our Cruiser Tough, a paddle designed to take you further. The natural flex of a fibreglass shaft enables a gentler transfer of energy, ideal for those getting into the sport.

The durability of the nylon blade makes it perfect for families, rocky shores or sharing amongst friends - an excellent starter paddle.

Pieces - 3PC
Blade Area - 465cm²
Paddle Length - 170cm to 220cm
Shaft Material - Glass Fibre
Blade Material - Nylon
Weight - 942g

Hybrid Tough

If you are looking for a paddle that is more advanced but still durable, this is the one for you.

If you're after a super-durable, carbon paddle to deliver unrivalled all round performance then our new Hybrid Tough is the best paddle for you. The durability of the nylon blade combined with the flex of the hybrid shaft and overall lightweight feel makes the Hybrid Tough an excellent paddle for rivers or shallow paddling.

Pieces - 3PC
Blade Area - 465cm²
Paddle Length - 170cm to 220cm
Shaft Material - Carbon/Glass
Blade Material - Nylon
Weight - 875g

Hybrid Carbon

Lightweight and fast at a great price point, available in two colours.

The Hybrid Adjustable SUP Paddle is a dynamic, highly responsive paddle that utilises a carbon weave for greater strength whilst keeping the paddle lightweight and super fast. Utilising a hybrid glass fibre and carbon laminate to deliver dynamic flex in the shaft.

Pieces - 3PC
Blade Area - 525cm²
Paddle Length - 170cm to 220cm
Shaft Material - Carbon/Glass
Blade Material - Carbon/Glass
Weight - 825g

Prime Tough

Lightweight with a tough and durable blade, available in two colours.

This performance paddle uses a 100% carbon weave for greater strength whilst keeping the paddle super light and responsive. It is the perfect blend of lightweight performance and robust durability for harsh environments. The nylon blade offers a hard wearing finish designed for shallow water exploration, white water paddling or rocky shorelines. Our Prime Lightweight SUP Paddle is available in blue and purple, so you can match your paddle to your board.

Pieces - 3PC
Blade Area - 465cm²
Paddle Length - 170cm to 220cm
Shaft Material - High grade carbon
Blade Material - Nylon
Weight - 840g

Prime Carbon

For those looking to advance their paddle boarding experience.

Introducing our lightweight, 100% carbon paddle offering the perfect weight to power ratio. Both the shaft and paddle use a high grade carbon weave to deliver more power with every paddle stroke. Super-fast and highly responsive - the Prime paddle allows you to get more out of every session.

Pieces - 3PC
Blade Area - 525cm²
Paddle Length - 170cm to 220cm
Shaft Material - High grade carbon
Blade Material - High grade carbon
Weight - 740g

NEW FOR 2022

Lash Connection System, designed to keep blade and mid section tethered together for convenience and easy set up

Interference Fit Hardware, All paddles are now composed of non-glued components meaning every piece of your paddle is both replaceable and recyclable.
