VOLVO PENTA EXCHANGE COMPONENTS

For marine and industrial engines

Volvo Penta exchange components

The Volvo Penta Exchange system gives access to a comprehensive range of remanufactured components — from injectors and turbos to longblocks, engines and IPS drives — offering a cost-effective alternative to repair and overhaul.

All Exchange components are completely restored to new condition and meet the same stringent quality and safety requirements as new parts. Exchange components are kept current with technical design changes and are offered with the same warranty as new Genuine Volvo Penta Parts.

Our comprehensive range of exchange components includes: Engine, Longblock, Shortblock, Cylinder head, Injector/Unit injector, Turbocharger, Circulation pump, IPS drives and components.

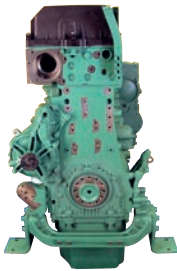

Double your warranty

Genuine Volvo Penta parts and exchange components are covered by our standard 12 month warranty. Have them supplied and installed by an authorized Volvo Penta dealer and we'll extend your warranty to 24 months — including the labor. Consult your nearest dealer for more details.

Engine includes: Cylinder block assembly with pistons, connecting rods, crankshaft, camshaft, cylinder heads, rocker mechanism, oil pan, valve cover, intake and fuel systems, exhaust and turbo, water pump.

Excluded (generally): flywheel housing, alternator and starter motor.

Longblock includes: Cylinder block assembly with pistons, connecting rods, crankshaft, camshaft, cylinder heads, rocker mechanism, oil pan, valve cover.

Cylinder head ready for installation with valves and springs and bearing housing (if applicable).

IPS is available as complete drive (excluding SUS, propellers, upper tension ring and rubber rings). Upper gear, steering unit servo (SUS) and lower gear including intermediate housing are available as separate units.

NOTE! This catalogue is a quick reference guide of the Volvo Penta Exchange system.

Please always consult Volvo Penta electronic parts catalogue (EPC) for the latest information regarding Exchange components.

If you are a customer, please contact your Volvo Penta dealer to order Exchange components.

Remanufacturing – for good reasons

It all starts with the used component, the core, which is the raw material of the remanufacturing process. The cores are completely disassembled, thoroughly cleaned and inspected in order to determine their condition. Cores not fulfilling our stringent requirements are discarded and the raw materials recycled.

Components fulfilling the criteria are restored to what is, technically, new condition. Wear parts and those not fulfilling the criteria are replaced with new genuine parts. All components are organized to correspond to the bill of material, which contains all design changes to secure that what is remanufactured always fulfills our latest technical specifications. When the components are reassembled, they are carefully tested to

verify product performance. Finally, the component is painted, to give it the same finish as a new part.

In all aspects, Volvo Penta exchange components are technically new. And what's more - used components have been given a new life as exchange components – up to 85 per cent of the raw material has been recycled through the remanufacturing process.

Good reasons for Volvo Penta exchange components:

- Completely remanufactured to new condition
- Cost-effective alternative to repair and overhaul
- Less impact on the environment through recycling
- Same quality and warranty as new Genuine Volvo Penta Parts
- Quick exchange, less downtime
- Updated to the latest technical specifications
- Lower ownership and operating costs
